ABOUT

Self-driven developer and AI student at UTS, now in the second year of a Bachelor of Artificial Intelligence. I build production web applications for real, paying clients, covering payments, authentication, databases and APIs from the ground up. I use AI-assisted development (Claude Code) as a daily multiplier, and I bring commercial thinking from hands-on sales, CRM and account management experience. Semi-professional footballer, and the discipline transfers.

EXPERIENCE

Freelance Web Developer
Jul 2025 – present
Woods Websites, self-employed · woodswebsites.com

- Run my own freelance studio building web apps and software solutions for small businesses
- Built and shipped full-stack apps for four paying clients: Ovens Soccer (ovenssoccer.com), Kingdom Property Care (kingdompropertycare.com), Speed and Sport, and Think Wisdom
- Delivered complete solutions: bookings, payments, authentication, databases and deployment
- Owned every engagement from scoping and design through to launch and ongoing support
- Used AI-assisted development (Claude Code) to accelerate delivery without sacrificing code quality

Kids Speed Coach
Oct 2024 – present
Speed In Sport Australia

- Coached children aged 7–16 in sprint mechanics, movement patterns, and agility training
- Maintained a positive, structured environment focused on development and athletic progression

Warehouse & Landscaping Assistant
Dec 2024 – present
Garden Life

- Warehousing duties including packing, receiving, stock organisation, and delivery
- Supported landscaping projects involving plant care and site maintenance

Internal Sales / Account Manager
Jan 2024 – Aug 2024
Graphic Art Mart

- Managed client accounts, negotiated deals and ran cold outreach to grow business relationships
- Worked daily in the company CRM maintaining customer records, order data and data quality
- Used Microsoft 365 and Excel throughout for quoting, reporting and account tracking

Retail Assistant
2021 – 2023
Bunnings Warehouse
